It's all about the Staycation...

By **Bridget Perriman**, Director, **World Class Adventures**

Ahhh 2020, you were a rubbish year, though you did deliver on sunshine!

As much as we all love thoughts of jetting off around the world, the UK has got so much to offer and #staycation2021 gives us a great opportunity to explore this summer!

I fondly remember bygone UK holidays where I scoffed delicious cream teas, enjoyed a Mr Whippy ice cream with a flake, and ate fish & chips out of the wrapper on the seafront or sat in a sunny pub garden with a pint and watched the world go by, but nowadays I need more adrenaline from my holidays! Our tour operator partners have plenty of ideas for the summer holidays, but availability is already extremely limited, so please do get in touch as soon as possible if I can help you plan and book a UK get away from it all!

I think we all feel we deserve the holiday of a lifetime when we are free to roam overseas again and there's no time like the present to get planning for 2022. Bucket List trips are going to be all the rage, so get in early before prices inevitably rise!

SUSTAINABLE TRAVEL - AND OUR CONTRIBUTION

At World Class Adventures, we realize that climate change is, without a doubt, one of the biggest threats to our planet's future. We know that tourism is responsible for 8% of the world's carbon footprint and this has to be confronted. That's why we're committed to doing our part to offset our carbon emissions.

Carbon offsetting allows you to balance out your climate impact and compensate for the emissions that your trip produces. It accomplishes this by reducing CO2 and other greenhouse gas emissions in other parts of the world. We partner with Sustainable Travel International to calculate carbon emissions for each of the flights we sell, utilizing internationally-recognized greenhouse gas emissions factors from the EPA. We then contribute the equivalent value to STI on your behalf to support offsetting projects across the globe.

We do recognise that offsetting is not enough, and will be taking steps in the coming year to reduce our footprint, with the ultimate goal of becoming a carbon-neutral business.
